

I cant create ul
diagram to this
class,
because i must
know gtk

it is main class.
It contain all
brain of this
progect

Exercise	MainWindow	SettingsWindo	Result Window
+pathToFile : str +exerciseText : str +statements : array float +variableA : float +variableB : float			
+init(path : str) : void +getExerciseText() : str +result(result : float) : bool +recreateVariables
